Please fill in the questions below, with short and clear statement.

External Stakeholder Questionnaire

Respondent Name : Fumihiko SHINOHARA
Stakeholder group : Experts
(Governing Board/Donor Agencies/Experts)

Respondent Job Title : Univ. Professor
Interviewer :

| No | Question | Answer |
|----|---|---|
| 1 | What is your opinion about SEAMOLEC? | The equity and equality together with quality in education and training have become one of the major worldwide trends due to the progress of the on-line technologies and variety of human needs. In this regard, the mission to achieve the goals clearly stated by your institution will become more important, but I am hoping better to keep on focusing on not only the international but also SEAMEO member states specific or indigenous perspectives. |
| 2 | What do you expect from SEAMOLEC as a SEAMEO Centre | <ol style="list-style-type: none">1. Much closer connection with JICA to seek funds and receive expertise.2. Creation of direct delivery network system of information like 'Mail magazine,' then to be frank and honest no need to access website by him/her-self.3. International focal point system may be expected, by which for example in case I would be a focal point in Japan, I could transfer information to those who are concerned in Japan.4. Host the International Conference not only organized only by your institution but also with other SEAMEO centers to strengthen each roles and functions and to carry out more collaborative research and development for the member states and other countries like Japan. |
